Seeking Application Technical Lead

Location: Torrance, CA area
Payrate: DOE
Contact: jobs@IntellectIT.com

Please submit H1b copies along with cover letter and resume.

Job Description: This position is for an experienced Application Technical Lead with 10+ years of experience in complex software projects using PeopleSoft Financials and PeopleTools. Requires a strong understanding of financial services and banking, analytical skills, problem determination and debugging, attention to detail, team work and excellent communication skills. Needs to communicate at different technical levels, from the application architects to the end user. Involved in entire project lifecycle, from scope through development and testing.

Responsibilities: This role requires demonstrated experience with the technologies that drive our products, and will report to the application team manager. The ideal candidate will excel in our fast-paced, collaborative, customer-first environment and will contribute in a variety of ways, including:

- Managing major application upgrade projects.
- Developing, applying, and documenting applications' customizations by following the development cycle (Scope, Design, Development, and Unit test).
- Debugging and resolving technical application issues encountered in production support, as well as throughout a project phase.
- Working closely with other application teams and/or IT infrastructure teams to implement technical solutions; and working with the Business Liaison group and user community, to provide technical and functional assistance (i.e. System Testing, UAT, Performance Testing, Training, etc.)
- Be ahead of the curve in advising the Application Manager on new technologies and tools that would be useful for the organization.
- Ensure proper documentation and knowledge sharing among the team to ensure continuity of business.

Required Skills & Experience:

- Over 10 years of extensive experience with PeopleSoft Financials, PeopleTools, and other applications in scope, and has managed multiple major version upgrade projects.
- Strong understanding in core business functions of financial services and banking.
- Extensive experience in analysis, design, development, and documentation of financial reports (SQL, nVision, queries, BI Publisher, etc.).

1024 Iron Point Road, Suite 1126, Folsom, CA 95630 – (916) 357-6631

- Highly proficient in using PeopleTools and writing PeopleCode, SQR, SQL, Application Engine programs, and Data-Mover scripts.
- Good knowledge of Integration Broker and Application Security.
- Strong understanding in development of component interfaces, application messaging, and workflow design.
- Experience with all phases of the development lifecycle (i.e. Scope, Design, Development, Testing, etc.)
